## Automatic Voltage Controller

ALTAIR manufacture's automatic voltage controllers up to 5mba. In the voltage ranges from 415volts, 6.6KV, 11KV and 33KV class. These automatic voltage controllers reduces maximum demand, this will provide improved power factor it will reduces break downs in electrical equipment's.

The general applications are cold storages, food processing units, steel mills, glass industries, electrical industries, Paper mills, Forma industries, cement plants, etc.

We manufacture these automatic voltage controllers ranging from 15kva to 5000kva, our standard capacities are 15kva, 30kva, 50kva, 75kva, 100kva, 125kva, 150kva, 200kva, 250kva, 300kva, 400kva, 500kva, 600kva, 750kva, 1000kva, 1500kva, 2000kva, 2500kva, 3000kva, 4000kva and 5000kva.

Our Standard voltage ranges are: 340v – 480vac, 360v – 480vac, 382v – 500vac we also manufacture different input voltage ranges as required by customers as per site conditions.

Our standard output voltage is 380volts and 400volts AC 3 Phase.
